I am a software developer with experience in C#, .NET and game development - Unity, bringing over a decade of analytical and project management skills from my previous work in land development.

Technologies and Frameworks:

- .NET: ASP.NET, EF, LINQ, REST API, WPF
- Game Dev: Unity, MonoGame (Microsoft XNA)
- Graphics: DirectX, HLSL
- Databases: PostgreSQL with SQL
- Art & 3D: Autodesk Maya, Blender
- Frontend: HTML, CSS, Blazor

Programming Languages:

- C#
- C++

Portfolio projects:

- Speech Therapy App – final project
- Perlin Noise usage for weather management data
- e-commerce database – Blazor UI, restful API, server based
- AI and architecture patterns – resource management and NPC movements implementations in games
- Algorithms, Databases, Multithreading – labs
- GPU – Phong shading using DirectX
- 3D graphics and Physics
- Games – both individual and team collaboration

Work experience:

Land Developer at Länsstyrelsen i Skåne

2017 – Present

Responsible for agreements and contracts for government-owned land (300+ properties) in the Skåne region. Took a 3-year sabbatical for studies.

Accountant at Malmö Stad

2016 - 2017

Budget and economic planning for cities properties, monitoring investments and planned maintenance for approximately 130 buildings.

Land and Development Engineer at Ovanåkers kommun

2013 - 2015

Land sales, property regulation, and land leasing for municipality owned land, GIS tools (ArcGIS, Geosecma)

Survey Specialist at Geosoma in Lithuania

2008 – 2010

Collecting data for the property register and developing planning documents for land units for formal registration in country system. Experience with surveying tools including total stations, GPS receivers, and CAD (AutoCAD, ArcMap).

Education:

Bachelor of Science in Computer Science

2022 - 2025

Specialization in Game Development at Malmö University

Master of Science in Urban and Country Planning

2008 - 2011

Lithuanian University of Agriculture

Bachelor of Business Development in Real Estate Development
